ROLLER DOORS

BUILT TO LAST . MADE TO PERFORM

THE PRACTICAL CHOICE

The classic roller door is the practical choice of the garage door world. Even when presented with very different scenarios, it will get the job done.

Our team at Centurion has developed a fantastic range of roller doors suitable for a wide range of purposes and markets, both residential and commercial. For many years, our roller doors have been used in securing homes, investment properties, business complexes, prefabricated sheds, self-storage facilities, and more... Now that is a versatile door!

RESIDENTIAL

Even though garage doors have diversified a lot since the invention of the roller door, some homeowners still love this traditional door. Roller doors are light, secure, and designed to withstand the harsh Australian climate. Many people also like that these doors don't require the installation of tracks along your garage ceiling, meaning that your ceiling space is left free for you to set up a car hoist or similar equipment.

SHED AND STORAGE

Roller doors are the ultimate door when it comes to shed and storage. Not only is this door perfect for securing your tools, equipment, and stored valuables, it can also be automated or installed with planetary chain-link equipment, allowing you easy access in and out of your shed or storage area. With a wide range of locks and handy features, this is definitely the door to look at when considering shed and storage.

Roller doors don't require the installation of **tracks** along your garage ceiling, meaning that your **ceiling space is left free** for you to set up a car hoist or similar equipment.

COMMERCIAL

Roller doors aren't just useful for residential properties. Our roller doors are designed to withstand the harsh Australian climate, especially when outfitted with our special wind lock system to prevent doors from pulling out during high wind conditions. You can also select a variety of different lock designs for added security and convenience.

CENTURION ROLLER DOOR OPENER

Automation is the way of the 21st century. Put convenience at your fingertips by automating your roller door with one of Centurion's roller door motors. Our motors are designed to operate quietly. This means that you won't wake up the family and whole neighbourhood when you open your door first thing in the morning.

DESIGNED TO BE SAFE

Centurion Garage Doors have a long history of developing products with exceptional safety-focused features, developed in-house by our innovative research and development team. Our range of roller doors are no exception.

Featuring designs such as our "Safe-Edge" to protect your fingers and our high security and cyclone proof range, our roller doors are designed to protect you and what you care about most.

*This feature refers to Centurion Residential "A" Series only

OUR SAFE-EDGE DESIGN®

Ordinarily, roller door guide rails have had sharp metal edges. At Centurion, we have eliminated the dangers associated with this by creating the "Safe-Edge" innovation.

If you look closely at the edge of your roller door guide rail, you can see that the edge has been folded over to protect unsuspecting fingers from sharp edges. That's just another innovation from Centurion to keep you and your family safe.

REGULAR GUIDE

OUR SAFE-EDGE

HIGH SECURITY & CYCLONE PROOF RANGE

Centurion has developed a range of high security cyclonic roller doors, engineered to ensure that your home and belongings stay protected from the prevailing winds that Australia is renowned for.

SAFER

Designed and tested to offer the very best in storm protection up to C4 conditions in accordance with AS/NZS 4505-2012 standards.

...MUCH SAFER!

Also featuring a unique high-security retention system to help create an incredibly secure door for warehouses, factories, and the family home.

QUIETER

All of our garage door products, including our roller doors and motors, have been specifically designed for smooth and quiet operation.

BETTER VALUE

The best garage door for safety and security at amazingly competitive prices.

WINDSHIELD® ROLLER DOOR INNOVATION

Our innovation, WindShield®, is a line of roller doors developed and tested in-house with the specific intention of meeting National Construction Code regulations (AS/NZS 1170.2-2011 Amdt 5) and to provide an economical wind-rated roller door for cyclonic and non-cyclonic regions.

BUILT TO LAST . MADE TO PERFORM

YOUR ROLLER DOOR

Depending on your needs, we can offer you a variety of locking options and track systems for your roller door, suitable for a variety of both residential and commercial needs. Just ask a Centurion representative and we'll find the right system to protect your property!

ROLLER DOOR LOCKS

STANDARD / COUNTERTOP

This type of lock is the standard lock for your residential roller door. They can be keyed differently or keyed alike depending on your needs.

SHOOT BOLT

These locks, featuring the ability to secure your door with a padlock, provide you with that added peace of mind and security.

SELF-STORAGE

The self storage lock, rightly named, is most commonly used by self storage complexes. This lock features the option of being double-padlocked.

TRACK GUIDE OPTIONS

RESIDENTIAL "A" SERIES

For doors up to 3100 mm wide. Features our unique "Safe-Edge" design.

COMMERCIAL "AA" AND "B" SERIES

For doors up to 5400 mm wide. Features heavy duty genuine BlueScope Zinalume and can be installed with planetary equipment.

SPECIALISED WINDSHIELD® SYSTEM

Wind-rated and high security cyclone proof systems, made from an incredibly thick and strong high performance grade aluminium.
